

Pema Yeshi Tshering

BLOCKCHAIN DEVELOPER

Email: pemayeshey87@gmail.com Phone: +975 17956150 Location: Thimphu, Bhutan

LinkedIn: linkedin.com/in/pema-yeshi-tshering

PROFESSIONAL SUMMARY

Final-year Computer Science undergraduate specializing in blockchain development and full-stack web engineering. Skilled in designing and deploying Ethereum-based smart contracts and decentralized applications (dApps), and in building responsive web platforms with React, Node.js, and modern tooling. Delivered multiple academic and independent projects spanning digital voting, supply-chain traceability, NFTs, secure storage, and bond tokenization. Combines strong analytical thinking, problem-solving, and a commitment to continuous learning with hands-on experience across the emerging Web3 landscape.

EDUCATION

Bachelor of Computer Science 2021 – 2026 (Expected)
Gyalpozhing College of Information and Technology

- Relevant coursework:** Data Structures & Algorithms, Database Systems, Software Engineering, Web Development, Computer Networks
- Focus areas:** Blockchain Technology, Full-Stack Web Development, Distributed Systems
- Completed academic projects centered on web application development and blockchain-based solutions.

Higher Secondary Education (Class XII), Science Stream 2019 – 2020
Punakha Central School

TECHNICAL SKILLS

Blockchain	Smart contract development, decentralized applications (dApps), blockchain fundamentals, tokenization
Programming	JavaScript, TypeScript, Solidity, Python, Java, SQL
Web & Frontend	HTML, CSS, React, responsive web design, REST APIs
Backend	Node.js, Express, API design, full-stack development
Databases	MySQL, PostgreSQL, MongoDB
Tools & Practices	Git, GitHub, command line, debugging, version control, testing

PROFESSIONAL EXPERIENCE

XRPL Campus Ambassador — Ripple 2022 – 2023

- Promoted blockchain literacy and the XRP Ledger (XRPL) ecosystem across the university student community.
- Planned and led workshops, seminars, and information sessions introducing blockchain fundamentals and XRPL development.
- Drove student engagement in decentralized technology through hands-on learning activities and guided discussions.
- Coordinated events with peers to expand campus outreach and encourage participation in blockchain innovation.

Design Intern — Graphic Lab Jun 2024 – Aug 2024

- Produced visual content for digital and print media alongside the design team.
- Applied core design principles — layout, typography, color theory, and composition — to client-ready deliverables.
- Supported marketing materials, social media graphics, and promotional content from concept to final output.
- Gained hands-on experience with industry-standard design tools and end-to-end creative workflows.

PROJECTS

Bond Tokenization Platform — Final Year Project 2025
Smart Contract Developer

- Engineered a blockchain platform that tokenizes traditional bonds into digital assets, enabling fractional ownership and improved liquidity.
- Developed smart contracts to automate bond issuance, interest distribution, and maturity settlement.
- Prioritized security, scalability, and regulatory awareness while bridging traditional finance with decentralized technology.

Decentralized Voting System 2022
Blockchain Developer

- Built a secure, transparent voting system on Ethereum-based smart contracts, ensuring immutability and preventing double voting.
- Developed a voter-facing interface and integrated wallet authentication for identity verification.

Supply Chain Traceability DApp <i>Smart Contract Developer</i> - Created a blockchain application to track products across supply-chain stages with tamper-proof transaction logs. - Implemented smart contracts that enforced data transparency and strengthened trust between stakeholders.	2023
NFT Marketplace Prototype <i>Frontend & Blockchain Integrator</i> - Developed a marketplace enabling users to mint, list, and purchase digital assets with a secure transaction flow. - Integrated IPFS for decentralized storage and connected smart contracts for on-chain ownership transfer.	2024
Secure File Storage System <i>Backend Developer</i> - Built an encrypted file-storage system using decentralized principles to safeguard data integrity and privacy. - Applied hashing and encryption techniques and designed APIs for secure file upload and retrieval.	2024

CERTIFICATIONS

- AWS Academy Cloud Foundations
- FIFA Grassroots Coaching

ACHIEVEMENTS & LEADERSHIP

- Leadership Certificate — SUPW Captain** (2020), Punakha Central School
- 2nd Place, Project Showcase** — Gyalpozhing College of Information and Technology (First Year)
- Inter-House Football Championship, Senior Category** (2019) — 1st Position
- Regional Dzongkhag Football Tournament** (2016) — 2nd Position
- College Department Football Tournament** — 2nd Position

LANGUAGES

- Dzongkha
- English
- Hindi
- Sharchop
- Nepali
